

Amina on Learning English at the Worcester Adult Learning Center

It was difficult for me to, to communicate in English, to speak with the other, and to work with my sons on their homework. That's why I took this first step to come here in the school.

My name is Amina Khadfy. I'm from Morocco. Mom of two kids. I want to work with them, and one of my sons is autistic. So, I want to communicate with their therapists, with their doctor.

Also, I want to teach my sons how to do this and how to do this. So, I should learn a good language, a good English language. I want to work on their homework, and I want to go to the college and to get a good job.

If I'm not in in this program, I am sure that I was with my kids at home doing the same routine of the day.

Yeah, classmates, we are different, from different countries, from different cultures. But although we are different, we are, we have the same desire to make a better life here in USA for ourselves and for our families.

When I came here, I saw Betsy, my teacher. Really, she's wonderful. She's the best teacher, really, because she gives me support and effort. And the, all the team, they give us a lot of services, a lot of opportunity. This class has given me a lot of new knowledges. Yes, and self-confidence to communicate, as I do right now, and a lot of opportunity.

And, the most opportunity for me it's, that's to go to the college.

Are you interested in continuing your education, or do you know someone who is? The Massachusetts Adult Literacy Hotline can help you find an adult education program that's right for you. Call or visit our website today.
