

Science Lab Report

Name:

Lab Partners:

Date:

STEP 1: QUESTION: What is the question you hope the experiment will answer?

STEP 2: BACKGROUND INFORMATION: Write a summary of your background reading.

STEP 3: HYPOTHESIS: Predict the outcome of the experiment.

STEP 4: MATERIALS, PROCEDURES, & OBSERVATIONS: Describe in your own words the materials and procedures used. Write down what happened as a result of the experiment. Mention only what you see, smell, hear, taste, or touch as a result of the experiment.

Materials:

Procedures:

Observations:

STEP 5: DRAW A CONCLUSION: What happened? What did you learn? Did anything go wrong? Did anything surprise you? Was your hypothesis correct?
